PROFESSIONAL SUMMARY

Full Stack Developer with 7+ years of experience building production-ready web applications and SaaS platforms using Next.js and Laravel. Focused on scalable frontend systems, API-driven architecture, and delivering real-world products used by active users. Based in the UK and open to relocation to Germany (EU Blue Card eligible).

TECHNICAL SKILLS

Frontend: Next.js, React, TypeScript, Tailwind CSS

Backend: Laravel, PHP, REST APIs, Node.js

Database: PostgreSQL, MySQL

Tools: Git, GitHub, Vercel, Cloudflare, AWS S3, Docker

Other: Stripe, Agile / Scrum

PROFESSIONAL EXPERIENCE

Web Developer | **IndeJuice Limited** | Birmingham, UK   *May 2023 – Present*

- Built production-grade Next.js interfaces for e-commerce and logistics platforms, supporting real user workflows and large-scale product catalogues.
- Delivered responsive mobile redesign that increased conversion rates by 28%.
- Integrated Stripe and PayPal payment systems handling thousands of transactions monthly.
- Developed scalable REST APIs using Laravel for internal tools and third-party integrations.
- Built end-to-end product catalogue and order management system to improve operational efficiency.

Associate Developer | **Lanka Designs** | Sri Lanka   *Jan 2021 – Jul 2021*

- Developed e-commerce platforms using Laravel, PHP, and WordPress, integrating PayPal and PayHere payment systems.
- Managed client requirements, hosting environments, and domain configurations for local and international projects.
- Contributed to Android UI design and multi-API integrations including Facebook

Associate Developer | **DigiFront** | Sri Lanka   *May 2020 – Jan 2021*

- Developed a workforce time management system (EasyTime) using ASP.NET within a team-based environment.
- Built and maintained business applications, including a golf scoreboard and work management system integrating ZOHO CRM and ZOHO Sprint APIs.
- Managed AWS S3 storage and automated server backup workflows using Ubuntu and Rsync.

Associate Developer | **Infosystm** | Sri Lanka   *Jul 2019 – Dec 2019*

- Developed an event hall booking system using Laravel for managing reservations and scheduling workflows.
- Built a Point of Sale (POS) system for a retail business and an employee management system using C#.

KEY PROJECTS

ClearTimeline — Client-facing SaaS for project scope, appraisals, and delivery history

- Built a production-ready SaaS platform primarily using Next.js with server-side logic and API integrations.
- Designed multi-role workflows for project tracking, approvals, and real-time status updates.
- Integrated APIs and backend services for data handling, authentication, and business logic.
- Used in real workflows to manage project communication, approvals, and delivery tracking.

LankaGuide — SEO-driven local directory for businesses and editorial content across Jaffna

- Built an SEO-optimised directory using Next.js with dynamic routing, metadata, and SSR/SSG.
- Structured scalable frontend for location and category-based pages to support content discovery.
- Developed Laravel-based backend services integrating Google Places API for data fetching and processing.
- Used to deliver location-based business listings and content for real users.

MockAura — Multi-surface exam platform for student testing, analytics, and admin workflows

- Built a production-ready multi-user exam platform using Next.js and Supabase with dashboards, role-based access, and student workflows.
- Integrated OpenAI APIs for automated question generation and dynamic exam content.
- Developed admin and student interfaces with analytics, payments, and exam management features.
- Designed scalable workflows to support exam creation, evaluation, and user management across multiple roles.
